We are currently recruiting for a:

HEAVY DUTY MECHANIC

Location: This position can be located in Cleveland, OH, Phoenix, AZ, Kansas City, KS or Atlanta, GA

Reports to: Diagnostics Manager

The Diagnostician will evaluate analytical results generated by the laboratories and provide diagnostic comments on reports to the customers. Provide verbal and written technical assistance to customers. Training will be provided. To perform this job successfully, an individual must perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required.

Primary Responsibilities

- Evaluate fluid (e.g., oil, fuel and coolant) test results and provide appropriate diagnostic commentary on customer reports.
- Recommend appropriate actions to customers based on data evaluation.
- Report results to customers via written reports and telephone.
- Maintain minimum production standards.
- Actively participate in Diagnostician conference calls.
- Maximize use of automated diagnosis applications.
- Respond to customer questions regarding test results data interpretations, specific tests and test methods, laboratory testing capabilities, and fundamental lubrication principles.

Required Skills:

- Mechanical engineer or heavy duty mechanic.
- 3+ Years work experience as a mechanic/maintenance technician. Familiar with diesel engines, drive train components, hydraulics, and industrial equipment.
- Fluent speaking and writing skills in English. Similar skills in Spanish and/or French would be looked at favorably.
- Must have good computer skills, including Microsoft Office products.
- Knowledge of general lubrication principles and understanding of the fundamentals of mechanical equipment an added plus.
- Industry related certifications such as STLE OMA, CLS or ICML MLT are a plus.
- Good communication skills.
