ALS Coal Richlands

► New Richlands facility largest coal laboratory in the world

Work has been completed on our new, state of the art, borecore testing and analysis facility. The facility, located in the Brisbane suburb of Richlands is be several times larger than our previous Ipswich lab; easily making it the largest coal laboratory in the world.

The new facility will further enhance ALS' position as an industry leader as well as demonstrate the company's commitment to the coal sector. The new facility, implementing industry leading technology, allows for the processing of samples in parallel, reducing turnaround times significantly whilst also ensuring that key factors such as quality, reliability and accuracy are not compromised.

ALS understands the importance of attaining rapid turnaround times for its clients. The facility has been designed with sample volume and throughput in mind. We are committed to ensuring accuracy of results within the quickest possible time frames.

For further information regarding the new facility or ALS Coal services, please contact us on 07 3713 8400 or email us at alscoalrichlands@alsglobal.com.
